

Instructions for Accessing the Tutorial

PC Users:

- Go to www.pearsonvue.com/NBPTS and download the **Web Tutorial and Sample Exercise (Windows Based-PC)** under **Related Links**
- Your browser (pop-up blocker) will probably first tell you that it has blocked the site from downloading the file and offer you options. Select "Download File."
- You will receive a security alert that asks if you wish to Run, Save, or Cancel. If you choose Run - you can download and install the file online. If you choose Save - you can download the file to your computer, then run the installer. This is a 40MB file, so it will take a few minutes.
- Follow the installation prompts to install the Pearson VUE NBPTS tutorial and Demo program on your computer.

Mac Users: The above tutorial is a Window's software application that is a replication of the test center test driver, which is PC-based. If you are using an Intel-equipped Mac with Windows installed, you should experience no problems running the tutorial. If you are using a "Mac-only" operating system, take the following steps:

- Be sure you have the latest Adobe Flash Player loaded on your computer. If you need to download the Flash Player, you will find it on the [Adobe Web Site](#).
- Be sure you are using the latest version of Mac's operating system 10.5 or higher.
- Go to www.pearsonvue.com/NBPTS and download the **Web Tutorial and Sample Exercise (Mac)** under **Related Links**.
- You will note that this is a "zipped" file. Double-click the file and it should un-zip in your download folder.
- Place a copy of the **NBPTS Tutorial and Demo** on your desktop or in a conspicuous file for easy access.
